**5G ONE POP-UP PROJECT**

3. The Joint Committee had before it a report by Lindsay McKenzie, Opportunity North East which sought approval for a 5G Pop-Up network project material change request.

**The report recommended:-**

that the Joint Committee approve the material change request as outlined within Appendix A.

The Joint Committee received a presentation from Karen O'Hanlon, who provided an overview of the project which included details regarding the value of private 5G networks for rural businesses and the benefits of 5G over traditional connectivity, which boosted productivity, drove innovation, lowered costs, and supported digital transformation and innovation.

She made reference to a pilot project relating to 'Herd Advance', which used infrared cameras for livestock health monitoring.

She also outlined the challenges and insights from the Pilot Phase of the Project, indicating that businesses would require significant technical support to adopt 5G and that planning and installation timelines would be longer than expected.

Ms O'Hanlon also provided details on the proposed way forward (two options) and the budget which remained unchanged.

Following questions and discussions relating to the report, the Joint Committee considered whether a phased approach on the delivery of the projects could be beneficial.

**The Joint Committee resolved:-**

to approve the material change request on the condition that updates are provided to the Joint Committee on the continued progress of each deployment.
