Complaint Handling Note

1. Processes

^{*} The corporate target for complaint resolution of 75% has been adopted by services during the first year of the interim TOM structures and will be reviewed at Cluster level at conclusion of the financial period to accommodate the setting of future improvement aims and baselines based on the outcomes from 2019/20.

^{**}Lessons learnt referred to in this Appendix are lasting actions taken/changes made to resolve an issue and to prevent future re-occurrence for example amending an existing procedure or revising training processes.

Cluster Level Measures - Local Indicators

	2018	B/19	Quarter 3	3 2018/19	Quarter 4	4 2019-20	Quarter '	1 2019/20	Quarter 2	Quarter 2 2019/20 Quarter		r 3 2019/20

Number of visits to Museums and Galleries venues in person	104,111	•	20,385	•	17,481	•	28.762	ŵ	39.360	ŵ	97,329	•	

Museums and Galleries Note

Since re-opening to the general public in November, the Aberdeen Art Gallery and Museum has generated 76,481 visits in person (excluding pre-opening visits and tours) which represents an increase of 53,848 (+237%) against the same two-month period immediately before closure for re-development.

Performance Indicator	Quarter 1 2019-20		Quarter 2 2019-20		Quarte	r 3 2019-20	Quarter 4 2019-20	
Performance indicator	Value	Status	Value	Status	Value	Status	Value	Status
Year-to-date percentage of participants progressing to a positive outcome within 6 weeks of exiting the NOLB programme*	14.2%		40%	<u></u>		<u> </u>		2
Year-to date number of participants progressing to a positive outcome within 6 weeks of existing the NOLB programme*	**	<u></u>	8	<u></u>		<u> </u>		2

No One Left Behind (NOLB) Measure Note

*The former Activity Agreements programme was replaced by the 'No One Left Behind' strategy as of April 2019 and introduced an extended age range and a revised suite of reportable outcome measures. The above measure has since been revised to present cumulative data which, where possible, reduces the need for data

suppression, focuses on the current financial period and mitigates against statistical variations created by quarterly reporting against a relatively small number of participations.

**Participant data against this measure has been suppressed for specific quarters as publication could lead to the identification of individuals due to the limited cohort numbers involved

Cluster Level Measures – National Service Standard Benchmark Indicators (Scottish Local Government Benchmarking Framework)

Performance Measure	2016/17 Value	2017/18 Value	2018/19 Value	Quartile Status ^	Value Short Trend	Indicator Ranking Long Trend	National Figure
Cost per visit to Museum and Galleries services	£2.38	£3.92	£3.00	2	•	•	£3.48
% Unemployed People Assisted into work from Council operated / funded Employability Programmes (model-based – as % of City unemployment)	7.25%	5.9%	5.5%	4	•	-	12.6%

Scottish Local Government Benchmarking Service Standard Analysis

Museums and Galleries

There was a total of 968,414 visits to Museum and Galleries services during 2018-19, an increase of 14.7% on the previous year whilst LFR based cost levels were reduced by 10.8% year-on-year, from £.3.54m to £3.16m. At these levels, the Cost Per Visit has improved on 2017-18, and retained the service's ranking quartile position whilst reverting to a favourable position in comparison with the national average cost.

Employability

This measure is closely related to the Local Statutory Performance Indicator measure reported to the September meeting of this Committee that indicated an increase in the proportion of participants assisted into work to 6.6% The Scottish Local Government Benchmarking Framework indicator reflects the availability of more recent calculations of unemployment levels** (published in October 2019) which results in a marginal fall in outcome, consistent with the national trend for this indicator, and an unchanged quartile position.

The practical impact of these Council programmes is best represented through participant outcomes which, in 2018-19, saw a total of 813 people receiving directly council funded or operated employability support and 272 (33.4%) of participants securing work. In 2017-18, the comparable outcome was 29.5%. The

wider measure used by the SLGBF, including additional partner programmes saw a total of 349 participants securing work from a model-based unemployment count of 6,300. In 2017-18, these figures were 330 participants against a lower level of unemployment of 5,600.

Members are asked to note that a report, related to this Indicator, on the Council's involvement in the Employability Pipeline programme is due to be considered at this meeting of Committee

**Local calculations use claimant count data (4,121) as a proxy denominator measure to meet the submission deadlines for SPI information whilst the SLGBF data source is the later Office of National Statistics publication of regional labour market unemployment models

2. Staff

Percentage and number of first reports, (for building warrants and amendments) issued within 20 working days *	98.2% (330)	>	97.2% (288)	>				~

Planning Note

*This performance indicator measures the time taken to provide a first technical report for all warrant and amendment to warrant applications, which is part of the national reporting suite. The performance target set by the Scottish Government is that 95% of first reports, (for building warrants and amendments), should be issued within 20 working days.

Cost of Planning and Building Standards per planning application**	£5,257	£6,695	£5,267	4	•	•	£4,439

Scottish Local Government Benchmarking Service Standard Analysis

Planning Application Determination Times

*The Average Determination Times for Business and Industry Planning Applications have fallen consistently over the past three years, is in the upper quartile od authority performance for the first time since the LGBF measure was introduced in 2012-13, is better than the national figure for the second consecutive year and is amongst the most improved in Scotland both short and long term.

Planning and Building Standards Cost

**This is a newly revised SLGBF measure for 2018-19 (populated with back-dated information) which is currently in review and requires to be assessed for consistency in the context of the formal full and comprehensive data on Annual Planning Performance at local authority level provided through the National Planning Performance Framework.

The treatment of LFR-based costings at individual LA level against this indicator can heavily influence outcomes, so an element of caution requires to be exercised at this point in time in determining relative performance and trend direction. Notwithstanding these observations, the service is initially positioned in the lowest performance quartile for 2018-19, although recording a substantive cost improvement and some positive movement within the quartile group.

The level of planning applications processed, used as the denominator for this measure, is also a substantive year-on-year and cross authority influence against this indicator which makes direct comparisons of cost, and short-term trend analysis, a less definitive methodology for assessing relative performance.

In 2018-19, there were 613 planning applications processed as opposed to 688 in the previous year with a reduction in gross planning expenditure from £4.6m to £3.24m.

As a cost per 1,000 of population indicator, which is an alternative measure that mitigates against the natural fluctuations in planning application levels, the City's planning function is provisionally calculated at £14,234 in 2018-19 that places Aberdeen in Quartile 1 amongst all local authorities, substantially below the national outcome of £20,428

Scottish Local Government Benchmarking Framework Note

* These measures align with the annual National Headline Indictor suite submission. An extended range of Strategic Place Planning measures relating to both Customer and Process themes is captured annually through publication of the Councils Planning Performance Framework Report document

YTD % of budgeted income received from Planning Application fees +	17%		44.5%	Δ	71%	Δ		?
YTD % of budgeted income received from Building Warrant fees	46.8%	S	81.4%	Ø	110.7%	>		?

Finance and Controls Note

- *Work is presently ongoing to develop publication of additional individual cluster-based Control measures which will be reflected in 2020/2021 performance reporting.
- ^Function level data relating to capital spend and financial performance is provided through City Growth and Resources (Finance) reporting. <u>Aberdeen City Quarterly</u> Financial Statement, Quarter 2 2019-20
- + Income flow from fees is traditionally affected by seasonality in the construction industry and the overall level of applications with historical data evidence being suggestive that a closing of the 'income gap' is generated against each subsequent quarter of the financial year. The Scottish Government is currently undertaking a national consultation in regard to revising the planning performance and fees regime, linked to implementation of the Planning (Scotland) Act 2019
