

I object to the variation referenced: AC0350

-For the following reasons:

The tunnels premise can, and has, produced noise pollution that passes through the structure of my building

-The events held at the Tunnels Premises have been held on week days and have continued to 2am; with significant noise disruption

-third party DJs / performers using the premises have, in the past, setup external speakers to the venue and failed to control noise; the third parties or staff outside did not care about the issue when confronted

-this variation would further exacerbate these issues

I would consider my objection in place until presented with evidence that further controls have been put in place to prevent noise pollution into the adjacent structures; and demonstration that performers and third party performers, as well as management and staff of the venue, are provided with a mechanism to assure they operate the premises during late hours without disturbing local residents.
