MANAGEMENT COMMENTARY

This is the first reporting point in the year for the Council's finances, following approval of the budgets in March 2022. The full year budgets reflected in the table below differ from those set by Council in March 2022 for a number of reasons. This is normal practice during the year as virements are identified and budget responsibilities change. In common with previous years there are pressures on the organisation that emerge during the year and this year the Council continues to be impacted by changes, response and recovery arising from the Covid-19 pandemic. As reported to the Committee in June 2022, supply chain volatility [RES/22/131] is significant at present and expected to continue and inflation is at a level not seen for decades and these are further factors that are having a major impact on our financial position.

The financial position is kept under regular review in relation to progress and forecasting and the conclusions included in Appendix 1 describe the overarching controls that the Council has in place to manage the financial position. There is an underlying commitment from Senior Management to pursue options to mitigate cost pressures and to work with the Chief Officer – Finance to ensure the overall agreed budget is adhered to.

Appendix 1 provides the Income and Expenditure Statement and Balance Sheet of the Council as at 30 June 2022. The forecast for the year is built on the information that was available at this time.

The General Fund, Housing Revenue Account and Common Good are all forecast to deliver in line with budgets set for 2022/23.

General Fund

With reference to the table below, key areas of the budget that the Council is managing are as follows:

The rising cost in gas and electric will affect all Council services to some degree. This is forecast to be £5.3m more than had been budgeted, before being offset in part by the centrally held inflation contingency. (Operations £3.265m, Customer £0.451m, Commissioning £0.161m and Resources £1.430m). These forecasts are included in the table below.

Beyond the quarter end, the Council's Waste and Recycling Facility at Altens East, operated by Suez, suffered a severe fire on 8 July 2022. The forecasts contained in this report were supplied before this event had occurred. The fire has implications for the Council balance sheet in respect of the impairment of asset value, and I am assured that insurance is in place to address the damage that has been done and reinstatement of the facilities. Insurance excess means cover is provided above £250,000, the excess will be funded by the Insurance Fund in the first instance.

There are also implications operationally and while arrangements have been made to continue services, further work must be done to fully understand the implications and changes that need to will need to be implemented while facilities are reinstated. At this time, it is too early in the process to assess how this will affect the costs and income of the waste service. An update will be provided in the Quarter 2 Financial Report due to be presented to the Committee on 2 November 2022.

Based on the forecasts for the year key highlights are as follow.

- 1. The main areas of pressure within Operations are:
 - Higher than budgeted spend on Out of Authority Placements. This is partly offset by lower spend on the Fostering service. Spend on Out of Authority Placements is lower

compared to that in 2020/21 & 2021/22 which indicates the service is returning to normal following the Covid-19 restrictions.

- Car Parking income was severely affected by the pandemic, and whilst it is now recovering there is a risk that it will not achieve the budgeted income.
- For Education the service is managing a substantial increase in children who have arrived in the city. This has been unexpected and is driven by two factors, the post-Covid increase of students from other countries to the two Universities, who are bringing their families with them. It is expected to continue through the forthcoming and future admission cycles. Secondly the number of children (and families) in the city seeking refuge from Ukraine.
- Also within Education there are increased costs of the 3R's unitary charge due to the inflationary uplift that will apply and there is a risk that long term absence spend will continue at 2021/22 levels creating higher than budgeted spending in 2022/23, however this is being closely monitored.
- In Education there are a relatively small number of teaching vacancies that are mainly in secondary schools in subjects which continue to be hard to recruit to, or in demand, for example: Design Technology, Maths, English and some Sciences.
- There is a risk that Early Years will not achieve the budgeted income from Cross Boundary Charging as the difference in the number of children between local authority areas is not as significant as anticipated. This will become clearer in Quarter 2.
- 2. The main areas of pressure within Customer are:
 - There is a risk that the level of rental income from Homeless Flats may be lower than budget due to the levels of in year activity to the end of the quarter.
- 3. The main areas of pressure within Commissioning are:
 - Governance is expecting an under recovery of licencing income.
 - Commercial services will be monitored, now that Covid restrictions have been removed it is anticipated a return to pre-pandemic levels of business could be achieved.
 - There is a risk that procurement budget savings will not be allocated across services as the savings may not be achieved due to the market position for most goods and services.
- 4. The main area of pressure within Resources is:
 - Commercial property trading account income has been revised to reflect current conditions this will continue to be monitored closely and the Council may be affected by bad debt provisions at the year end. This includes the additional costs of energy for corporate facilities and also the Energy Centre and AD Plant at The Events Complex Aberdeen, and related contracts.
- 5. The main areas of pressure within Integrated Joint Board (IJB)/Adult Social Care are:
 - The recovery of the services from the impact of Covid-19 in areas such as supplier sustainability.
 - There is a risk that there will be higher than anticipated spend on direct payments to clients in areas such as homecare as the IJB's care providers are operating at maximum capacity.

The JJB is still incurring additional costs due to the impact of Covid-19. For 2022/23 the Scottish Government will only cover specific categories of covid costs relating to supplier sustainability payments, extra staff costs and Personal Protective Equipment (PPE). Other

categories of covid costs such as extra care home placements and lost income will not be covered by the Scottish Government as it was in previous years.

The Council is forecasting that additional costs will be covered by additional Scottish Government grant for eligible costs, savings achieved elsewhere, or by using Reserves held at the start of the financial year. Therefore, no additional pressure is expected on the General Fund from the JJB.

- 6. The Joint Boards budget and forecast outturn is based on the amount requisitioned by Grampian Valuation Joint Board. This is currently forecast be on budget.
- 7. Miscellaneous Services includes capital financing costs, the cost of repaying the borrowing received in the past for General Fund Capital Programme investment. Capital Financing Costs is the most significant budget within Miscellaneous Services, and incudes the impact of accounting for loans fund repayments on a prudent basis, approved by the Audit Risk and Scrutiny Committee in April 2019.

To respond to the financial pressures faced by local authorities as a result of the pandemic, the Scottish Government provided a package of financial flexibilities that could be used by local authorities to address funding pressures. One of these was the option to defer the repayment of debt for one year. The Council has opted to utilise this option for 2022/23. This will provide a saving of £9.1m. The repayment of this debt must then be made within 20 years from the end of the 2022/23 financial year.

The bad debt provision has been updated to take account of latest data, which shows a significant value of general invoices that remain unpaid. This budget sits within Miscellaneous Services and is under regular review. The council reinstated income recovery processes in 2021 following deferral of action due to the pandemic.

8. Across the whole of the Council the planned reduction in the number of posts that are affordable is being managed through voluntary and natural processes, i.e. no compulsory redundancy. This means that there is expected to be continued reduction in the total workforce during the year. The corporate saving for a reduced workforce is captured in the "Corporate Budgets". The full value of the staff savings is forecast to be above budget at this time; however, the education staffing vacancy figures are not included in Quarter 1 figures.

Local Government pay negotiations are ongoing at this time, and while the Council has made provision within its budget for an average award of 2% across the workforce, without additional, recurring, Scottish Government financial support there is the risk that when agreed, the pay award will add cost to the bottom line.

Contingencies also holds the in-year revenue contingency for the General Fund and the forecast includes the use of that contingency later in the year. The actual position will depend on future unplanned events or from those arising from the risk registers and, where identified, contingent liabilities becoming more certain (see Appendix 1). It means the Council is resilient to changes that might happen in the future that have not been able to be quantified financially.

- 9. Council Expenses include the budgets for all councillors' costs, including salaries and expenses. These are forecast to be on budget.
- 10 The Non-Domestic Rates figure is set by the Scottish Government as part of its overall funding support package rather than the amount billed and receivable by the Council. The forecast amount receivable by the Council is in line with Government distribution information.

- 11. The General Revenue Grant is set by the Scottish Government as part of its funding support package for Local Government.
- 12. Council Tax income is forecast to be above budget for 2022/23 based on better than expected income levels in 2021/22, along with the 3% increase agreed by the Council in setting the 2022/23 budget.
- 13. Use of Reserves. The Council approved in its 2022/23 budget that a sum of £5.519m will be used from earmarked General Fund reserves to fund the budget. The Council expects to draw down this amount in full.

Housing Revenue Account

14. The overall HRA budget is balanced however there are several areas of pressure. These are the potential increases in repairs and maintenance from the cost of materials, utilities, and housing voids. The higher costs in these areas will be offset by a reduced contribution to Capital from Current Revenue (CFCR).

Earmarked Reserves

As at 1 April 2022 the Council held £62.9m of earmarked reserves across the General Fund and HRA and expenditure is estimated to be incurred over a period of years.

Expenditure in relation to the delivery of other specific projects, funded by the earmarked reserves is not included in the figures in the tables above, the expenditure being set against the finite reserves held at the start of the year. As an example, the Council expects to continue to incur expenditure from the Transformation Fund in 2022/23 progressing the digital programme of transformation.

The other significant earmarked reserves to draw attention to at this time is the Second & Longterm Empty Properties reserve (£13.110m), which is set aside for affordable housing. Expenditure in 2022/23 will depend on the progress with a number of developments including Summerhill and Wellheads and the amount of Scottish Government funding and Section 75 income (developers' contributions) to be used as this funding is time limited, these funds support the delivery of additional social housing by the Council.

As referenced earlier in the report, the earmarked Covid-19 Grants (£19.016m) are for areas such as Education recovery, income shortfall and General COVID funding. It is anticipated at this stage this funding will be fully utilised to employ additional teachers, support staff within Education, support income shortfalls in such areas such car parking, commercial properties, and council tax, essentially using the sums available to balance the budget – and this is subject to the ongoing review and further refinement of spending and income forecasts in line with Council financial management arrangements.

Balancing the Budget through Controls and Monitoring Structures

Specific actions that will continue, to manage spending and work towards reducing the operating deficit include:

- Ongoing review and analysis of the Covid-19 impact on council budgets, income in particular costs associated with protecting customers and staff.
- Detailed and effective management of turnover of staff and vacancies and an underlying assumption that the overall cost of staff will continue to reduce during the remainder of the year. The Chief Officers for People & Organisation and Finance following consultation with the Convener of City Growth and Resources Committee, are currently part of the vacancy advertising process.
- Ongoing review and scrutiny of the out of authority placements for children by the Chief Officer Integrated Children's Services.

- Specific work in relation to the Service Income policy to ensure full cost recovery is achieved from a range of services that the Council delivers, such as support services, housing services, accommodation and building services.
- Monitoring and management of council long-term debt in light of the agreed policy and capital spend forecasts for 2022/23.
- The voluntary severance / early retirement scheme is how the Council has incentivised workforce reductions. This is an expensive scheme, funding must be found and accounted for up front from revenue resources. For the last few years, it has been permitted, by Scottish Government Ministers, for Local Government to use Capital Receipts to fund this revenue cost. This scheme has been extended until 31 March 2023. The Council has seen limited capital receipts since the March 2020, with a retained balance of £0.8m on the balance sheet at 31 March 2022. To maintain robust financial controls, and with such tight financial constraints on the funding of the scheme, consideration should be given to the parameters of the current scheme.

To ensure tight controls are in place over expenditure, management have created the following control boards, through which requests to spend must be cleared:

The Demand Management Control Board captures the commissioning and procurement intentions for revenue expenditure as they arise and provides an environment for demand-based challenge – this is co-chaired by the Chief Officers for Early Intervention & Community Empowerment and Data & Insight.

Similarly, the Capital Board oversees the progress and emerging aspects of capital planning and delivery, but also connects to the asset elements of the revenue budget and capital financing requirements – this is chaired by the Chief Officer for Capital.

The Performance Board has oversight of the financial performance reporting, this is co-chaired by the Directors of Resources and Chief Operating Officer and brings together the emerging and escalated issues from overall Council performance and agrees actions.

Balancing the Budget through the monitoring and control of risks.

Risks are reviewed on a regular basis at a strategic level by the Risk Board on a monthly basis and at an operational level by Chief officers and their teams daily.

The main risks to the Council remains the recovery of income and reduction in resources directed towards recovery from the impacts of Covid-19, the high inflation level and extremely high increases experienced in the cost of energy supplies as these will continue to have a substantial impact on Council services.

It is predicted that the increased cost of supplies and services in the trades maybe a significant risk in areas such as Building Services and Roads.

Contingent Liabilities are noted to try and capture potential liabilities which could result in costs being incurred in the future. As part of the budget process, contingent liabilities are reviewed and described within the budget pack presented to Council. The Corporate Management Team continues to monitor the status of these. A review of the contingent liabilities, listed in Appendix 1, has not established any significant shift in certainty or in the Council's ability to quantify the financial exposure. On that basis there is no adjustment included in the forecasts for the year, they will continue to be reviewed quarterly and any change reported as appropriate.

Conclusion

Based on the information available, and set out in this report, the forecast for the overall position of the General Fund is a balanced budget. The Housing Revenue Account is also in a balanced position, and this is captured in the tables set out below.

As at 30 June 2022	Budget 2022/2023	Outturn 2022/2023 Quarter 1	Variance from Budget		Notes
	£'000	£'000	£'000	%

General Fund Capital Programme

As instructed by the report RES/22/136 – Council Financial Performance – Quarter 4 2021/22, at City Growth and Resources committee on 21 June 2022 this update incorporates the outcomes of the completed financial year into the reprofiled programme for 2022/23 to 2026/27.

The Capital Programme also now includes additional projects following confirmation of external funding awards:

- £1.310 million towards improvements in Chapel Street, Car Park under the terms of the agreed lease;
- £3.000 million for Photovoltaics;
- £0.847 million from the Place Based Investment Fund for 2022/23;
- £0.074 million towards Active Travel plans;
- An increased Cycling Walking Safer Routes grant for 2022/23, now raised to £1.467 million;
- £0.684 million towards creation of additional recycling capacity at Sclattie Waste Transfer Station

Further reprofiling is recommended in this report, based on the conclusions contained in Appendix 5.

Total Income	(271,741)		(262,539)	(37,901)	(219,500)	43,039

Profiling of project budgets and forecasting of outturns remains challenging given the wide range of factors now affecting construction supply chains. As such the forecast outturns quoted above represent a point in time and there is a strong probability that they will be subject to change as the financial year progresses and additional information becomes available.

Further details of these factors were included in the report Supply Chain Volatility – RES/22/131 presented to the City Growth and Resources committee on 21 June 2022. A more detailed report

presenting the outcomes of a review conducted by the Chief Officer – Capital on projects included in the Capital Programme is included as Appendix 5 to this report.

Capital expenditure for Quarter 1 2022/23 includes purchase of further hydrogen double decker buses for the Aberdeen fleet, continued construction works related to the Energy from Waste (EfW) facility in East Tullos and associated Torry Heat Network, and the on-going refurbishment of Union Terrace Gardens. Expenditure was also incurred on progressing the New Schools programme, with the New Milltimber Primary opening at the end of May. The City Centre Masterplan also achieved a significant milestone with the demolition of the former Aberdeen Market.

Further legal commitments entered into during Quarter 1 2022/23 include the contract for the dualling of South College Street, funded through the Bus Partnership Fund, which was awarded at the end of June 2022. The legal agreements governing the Hydrogen Joint Venture with bp were also formally completed in June 2022.

Housing Capital Programme

The Housing Programme is also subject to the review instructed by City Growth and Resources Committee on 21 June resulting from the external cost and time pressures, this will consider the timeline delivery, financial viability, and the impact on service delivery because of revised delivery timelines.

Spend is low in the rolling programme in areas such as kitchen, bathroom, structural repairs, lift and window replacements. The kitchen and window contract has experienced supply chain issues however both have now moved to framework contracts which will result in improved performance in these areas.

The assumption at Quarter 1 is that budgeted expenditure will be achieved in 2022/23, this will be updated following the review.

Housing Capital Programmes	Approved Budget	Expenditure to date	Forecast Expenditure

Common Good

Notes

- The Common Good is forecast to be on budget as at 30 June 2022.
- The investment of cash balances in a multi-asset income fund, approved by Council on 10 March 2021 has now been implemented. The value of the investment may fall as well as increase, this will be reported quarterly. As at 30 June 2022 the value of the investments was £25.8m, a reduction on the quarter of £2.012m. Cash balances will be affected by this change as will the overall Net Value of the Common Good.
- The investment with Fidelity remains a long-term investment and should be measured over a 3 to 5 year period.
- Income levels expect to be maintained and the budgeted income achieved
- Recurring expenditure is generally forecast to be on budget, with events expecting to proceed this year, uninterrupted by Covid-19 restrictions, and grants payable throughout the year to the wide range of approved organisations.
- The budgets to support Civic activities are subject to review following the election of the new Council and Lord Provost, and forecasts in future reports will be updated to reflect and changes. A budget virement of £2,500 within the Civic budgets provides some additional support to the Burgesses of Guild.
