Introduction & Background

This document is made publicly available on our website, in order to help stakeholders (including members of the public) understand the challenges currently facing health and social care in Aberdeen.

This is the strategic risk register for the Aberdeen City Integration Joint Board, which lays the foundation for the development of work to prevent, mitigate, respond to and recover from the recorded risks against the delivery of its strategic plan.

Aberdeen City Health & Social Care Partnership

A caring partnership

Just because a risk is included in the Strategic Risk Register does not mean that it will happen, or that the impact would necessarily be as serious as the description provided.

More information can be found in the Board Assurance and Escalation Framework and the Risk Appetite Statement.

	Consequences: Services are not tailored to individual needs; reputational damage; and IJB does not meet strategic aims	
7	Cause- The ongoing recruitment and retention of staff. Event: Insufficient staff to provide patients/clients with services required. Consequence: Potential loss of life and unmet health and social care needs, leading to severe reputational damage.	Very High

-1-

Description of Risk: Cause: The commissioning of services from third sector and independent providers (eg General Practice and other primary care services) requires all stakeholders to work collaboratively to meet the needs of local people.
Event: Potential failure of commissioned services to deliver on their contract
Consequence: There is a gap between what is required to meet the needs of local people, and services that are available.
Consequences: to the individual include not having the right level of care delivered locally, by suitably trained staff.
Consequences: ability of other commissioned services to cope with the unexpected increased in demand.
Consequences to the partnership includes an inability to meet peoples needs for health and care and the additional financial burden of seeking that care in an alternative setting

Strategic Aims: Caring Together
Strategic Enablers: Relationships and Infrastructure

Leadership Team Owner: Lead Commissioner and Primary Care Lead

Risk Rating: low/medium/high/very high
HIGH

Rationale for Risk Rating:

- There continue to be significant gaps in our ability to engage at a strategic level with some parts of the social care sector eg care home owners, and therefore a lack of alignment in our strategic response to the demands placed upon the whole system. Evidence of the impact of this includes a mismatch between the physical capacity we have available to meet the outcomes of people and the suitability and appropriateness of that capacity eg unsuitable accommodation, and a lack of appropriately trained staff
- Increased demand in primary care and widespread recruitment difficulties continues to impact on practices, which has led to practices handing back their contracts or closing their lists.
- Increased risk of reduction in General Dental Practitioners capacity as a result of patient deregistration activity seen in some regions
- The removal of the Covid-19 supplier relief funding will have an impact on providers.
- Recruitment difficulties in residential and non-residential businesses.
- Delayed implementation of Primary Care Improvement Plan (PCIP) due to staff redeployment due to Covid and lack of available workforce for recruitment.

LIKELIHOOD	Negligible	Minor	Moderate	Major	Extreme

Rationale for Risk Appetite:
 As 3rd and independent sectors are key strategic partners in delivering transformation and improved care experience, we have a low tolerance of this risk. It is suggested that this risk tolerance should be shared right throughout the organisation, which may encourage staff and all providers of primary health and care services to escalate valid concerns at an earlier opportunity.

Risk Movement: increase/decrease/no change
INCREASE 03.10.22

Controls:

- Conscious cultural shift to change relationships, with all strategic commissioning activity proceeding in a collaborative manner.
- Examples of collaborative commissioning models used as exemplar models within the City. Care at Home, Mental Health / Learning disability accommodation review.
- Strategic Commissioning Programme Board (includes representatives from third and independent sectors)

Mitigating Actions:

- All opportunities to work in a collaborative manner to commission services are advertised on Public Contract Scotland, as well as individual invitations made to CEOs / owners of social care services.
- Additional offers are made to encourage dialogue where the provider is unavailable to attend collaborative commissioning workshops etc.
- Agreed strategic commissioning approach for ACHSCP.

For example, even with the best monitoring system, the closure of a practice can happen very quickly, with (in some cases) one partner retiring or becoming ill being the catalyst. Market forces and individual business decisions regarding community optometry, general practice and general dental practitioners cannot be influenced by the Partnership. We are currently undertaking service mapping which will help to identify any potential gaps in market provision Public Dental Services staffing capacity to flexibly increase service provision in short term Difference between National Care Home Contract rate (last reviewed in 2013) and providing a 24 hour residential service. Inability to benchmark accurately due to variation of service models Contract Monitoring visits (enhanced services)
<p>Current performance:</p> <ul style="list-style-type: none"> We now have established a care at home strategic providers group, with agreed terms of reference. Their strategic ambition is to ensure the safe and effective delivery of care at home across Aberdeen. We have recently published and distributed market position statements for both residential and training and skills development for service users with either mental health or learning disability. Both have been co-produced with providers through a series of workshops which had been advertised locally and through public contracts Scotland. A financial risk rating of each residential care home/setting is being undertaken, to give intelligence on the risk across these businesses. Regular GP practice status reports which notes operational performance levels 	<p>Comments:</p> <p>Cost of living will impact on the provision of the service and the staff ability to get to work due to fuel prices. Lack of space for MDT working. Sustainability report has a limited predictability due to the ever changing nature of primary care.</p>

Controls: <ul style="list-style-type: none"> Financial information is reported regularly to the Risk, Audit and Performance Committee, the Integration Joint Board and the Senior Leadership Team Risk, Audit & Performance receives regular updates on transformation programme & spend. Approved reserves strategy, including risk fund Robust financial monitoring and budget setting procedures including regular budget monitoring & budget meeting with budget holders. Budgets delegated to cost centre level and being managed by budget holders. 			Mitigating Actions: <ul style="list-style-type: none"> The Senior Leadership Team are committed to driving out efficiencies, encouraging self-management and moving forward the prevention agenda to help manage future demand for services. The Senior Leadership Team have formalised arrangements to receive monthly financial monitoring statements. 		

Rationale for Risk Rating:

- If the partnership does not have sufficient funding to cover all expenditure, then in order to achieve a sustainable balanced financial position, decisions will be required to be taken which may include reducing/stopping services
- If the levels of funding identified in the Medium Term Financial Framework are not made available to the IJB in future years, then tough choices would need to be made about what the IJB wants to deliver. It will be extremely difficult for the IJB to continue to generate the level of savings year on year to balance its budget. The MTFF will be reported to the IJB in February 2023.
- The major risk in terms of funding to the Integration Joint Board is the level of funding delegated from the Council and NHS and whether this is sufficient to sustain future service delivery. There is also a risk of additional funding being ring-fenced for specific priorities and policies, which means introducing new projects and initiatives at a time when financial pressure is being faced on mainstream budgets.
- IJB is currently experiencing significant pressures due to inflation, cost of living, staff costs, energy costs.

Rationale for Risk Appetite:
 The IJB has a low-moderate risk appetite to financial loss and understands its requirement to achieve a balanced budget. The IJB recognises the impacts of failing to achieve a balanced budget on Aberdeen City Council & its bond – an unmanaged overspend may have an impact on funding levels.

However, the IJB also recognises the significant range of statutory services it is required to meet within that finite budget and has a lower appetite for risk of harm to people (low or minimal).

The scale of the challenge to make the IJB financially sustainable should not be underestimated. • Financial failure of hosted services may impact on ability to deliver strategic ambitions. • There is a gap in terms of the impact of transformation on our budgets. Many of the benefits of our projects relate to early intervention and reducing hospital admissions, neither of which provide early cashable savings

Appendix 2 – Risk Assessment Matrices (from Board Assurance & Escalation Framework)

Table 1 - Impact/Consequence Definitions

Descriptor	Negligible	Minor	Moderate	Major	Extreme
Patient Experience	Reduced quality of patient experience/ clinical outcome not directly related to delivery of clinical care.	Unsatisfactory patient experience/clinical outcome directly related to care provision – readily resolvable.	Unsatisfactory patient experience/clinical outcome, short term effects – expect recovery <1wk.	Unsatisfactory patient experience/ clinical outcome; long term effects –expect recovery >1wk.	Unsatisfactory patient experience/clinical outcome, continued ongoing long term effects.
Objectives/ Project	Barely noticeable reduction in scope, quality or schedule.	Minor reduction in scope, quality or schedule.	Reduction in scope or quality of project; project objectives or schedule.	Significant project over-run.	Inability to meet project objectives; reputation of the organisation seriously damaged.
Injury (physical and psychological) to patient/ visitor/staff.	Adverse event leading to minor injury not requiring first aid	Minor injury or illness, first aid treatment required.	Agency reportable, e.g. Police (violent and aggressive acts). Significant injury requiring medical treatment and/or counselling.	Major injuries/long term incapacity or disability (loss of limb) requiring medical treatment and/or counselling.	Incident leading to death or major permanent incapacity.
Complaints/ Claims	Locally resolved verbal complaint	Justified written complaint peripheral to clinical care.	Below excess claim. Justified complaint involving lack of appropriate care.	Claim above excess level. Multiple justified complaints	Multiple claims or single major claim. Complex justified complaint.
Service/ Business Interruption	Interruption in a service which does not impact on the delivery of patient care or the ability to continue to provide service.	Short term disruption to service with minor impact on patient care.	Some disruption in service with unacceptable impact on patient care. Temporary loss of ability to provide service.	Sustained loss of service which has serious impact on delivery of patient care resulting in major contingency plans being invoked.	Permanent loss of core service or facility. Disruption to facility leading to significant "knock on" effect.
Staffin and Competence	Short term low staffin level temporarily reduces service quality (< 1 day). Short term low staffin level (>1 day), where there is no disruption to patient care.	Ongoing low staffin level reduces service quality Minor error due to ineffective training/implementation of training.	Late delivery of key objective/ service due to lack of staff. Moderate error due to ineffective training/ implementation of training. Ongoing problems with staffin levels	Uncertain delivery of key objective /service due to lack of staff. Major error due to ineffective training/implementation of training.	Non-delivery of key objective/ service due to lack of staff. Loss of key staff. Critical error due to ineffective training / implementation of training.
Financial (including damage/loss/ fraud)	Negligible organisational/ personal financial loss (£<1k).	Minor organisational/ personal financial loss (£1-10k).	Significant organisational / personal financial loss (£10-100k).	Major organisational/personal financial loss (£100k-1m).	Severe organisational/ personal financial loss (£>1m).
Inspection/Audit	Small number of recommendations which focus on minor quality improvement issues.	Recommendations made which can be addressed by low level of management action.	Challenging recommendations that can be addressed with appropriate action plan.	Enforcement action. Low rating. Critical report.	Prosecution. Zero rating. Severely critical report.
Adverse Publicity/ Reputation	Rumours, no media coverage. Little effect on staff morale.	Local media coverage – short term. Some public embarrassment. Minor effect on staff morale/ public attitudes.	Local media – long-term adverse publicity. Significant effect on staff morale and public perception of the organisation.	National media/adverse publicity, less than 3days. Public confidence in the organisation undermined. Use of services affected.	National/International media/ adverse publicity, more than 3 days. MSP/MP concern (Questions in Parliament). Court Enforcement. Public Enquiry/FAI.

Table 2 - Likelihood Definitions

Table 4 - NHSG Response to Risk

Describes what NHSG considers each level of risk to represent and spells out the extent of response expected for each.

Level of Risk	Response to Risk
Low	Acceptable level of risk. No additional controls are required but any existing risk controls or contingency plans should be documented. Managers/Risk Owners should review these risks applying the minimum review table within the risk register process document to assess whether these continue to be effective.
Medium	Acceptable level of risk exposure subject to regular active monitoring measures by Managers/Risk Owners. Where appropriate further action shall be taken to reduce the risk but the cost of control will probably be modest. Managers/Risk Owners shall document that the risk controls or contingency plans are effective. Managers/Risk Owners should review these risks applying the minimum review table within the risk register process document to assess whether these continue to be effective. Relevant Managers/Directors/Assurance Committees will periodically seek assurance that these continue to be effective.
High	Further action should be taken to mitigate/reduce/control the risk, possibly urgently and possibly requiring significant resources. Managers/Risk Owners must document that the risk controls or contingency plans are effective. Managers/Risk Owners should review these risks applying the minimum review table within the risk register process document to assess whether these continue to be effective. Relevant Managers/Directors/Executive and Assurance Committees will periodically seek assurance that these continue to be effective and confirm that it is not reasonably practicable to do more. The Board may wish to seek assurance that risks of this level are being effectively managed. However NHSG may wish to accept high risks that may result in reputation damage, financial loss or exposure, major breakdown in information system or information integrity, significant incidents(s) of regulatory non-compliance, potential risk of injury to staff and public.
Very High	Unacceptable level of risk exposure that requires urgent and potentially immediate corrective action to be taken. Relevant Managers/Directors/Executive and Assurance Committees should be informed explicitly by the relevant Managers/Risk Owners. Managers/Risk Owners should review these risks applying the minimum review table within the risk register process document to assess whether these continue to be effective. The Board will seek assurance that risks of this level are being effectively managed. However NHSG may wish to accept opportunities that have an inherent very high risk that may result in reputation damage, financial loss or exposure, major breakdown in information system or information integrity, significant incidents(s) of regulatory non-compliance, potential risk of injury to staff and public.
