Dear Ms Swanson,

I would like to appear before the committee on the 13th of September and put my objections across . I would also like to know if it would be possible to see the HSE report that was carried out. I would like to know what it was classed as Health, Safety or Environmental. This is my field of expertise and would be very interested to know.

As you know we are still not happy with the recommendations, so I would ask to be able to speak with the Chief executive for Aberdeen council. We now feel that this would affect my Fathers Human rights due to being the only house to have restrictions put in front of it. This appears to be a case of victimisation. Also not very convenient with my Father being disabled and unable to walk long distances, without a struggle.

Regards

Colin Diver
