The Police Service in Scotland Performance Report

- [Overview/Explanations](#)
- Inter-relationship between the:
 - [Scottish Government/Single Outcome Agreements \(SOAs\)](#)
 - [Scottish Policing Assessment \(SPA\)](#)
 - [Scottish Policing Performance Framework\(SPPF\)](#)
- [Significant Changes In National Performance](#)
- [Performance Indicators](#)
- [The Policing Landscape: Force strength \(headcount\), land area and population](#)

The Overview/Explanations section is applicable to all of the report and must be borne in mind when viewing statistical information contained in the document.

Navigating through the Report

The report offers a degree of electronic navigation by use of hyperlinks. The text, which offers a hyperlink, has been coloured blue. Links back to the starting point are similarly coloured blue and will appear at either the beginning or end of a section of text or a reference point beside a statistical table.

Overview/Explanations

Data Included

All data is provided by individual forces and is extracted from their respective databases. These figures are regularly used in other reports such as force crime bulletins and reports to police boards.

It should be noted that due to seasonal variations, fluctuations in performance occur. These fluctuations may be short-term and due to a variety of reasons, such as school holidays, events happening at a particular time in the year, daylight hour changes and operations or initiatives undertaken.

Audit and Accountability

The ACPOS PMBA Performance Reporting Sub Group (PRSG) closely monitors the data in the report and holds forces accountable for the quality of their submissions and examines differences in performance standards to allow the identification of good practice. In addition, indicators are subject to audit either internally or externally.

Commentary

The commentary section in this report will focus on significant variations in performance at a national level and will identify a force(s), which has impacted on the direction of travel nationally whether against the previous year or where available, the three-year average. Variations within force figures which may be important to that individual force, but do not impact on the national picture, will not be commented upon.

Points To Note:

- The statistics contained in this report are provisional and subject to change following auditing.
- Where an overall Scotland figure is not shown this is primarily due to not all forces being able to submit data. The following abbreviations/symbols are used throughout the report:

N/A Not available due to force technical issues
N/S Not submitted by a force(s)
NAI New or amended indicator – data may not be available for each year
~ A comparison / calculation cannot be made due to missing data
∞ Denotes that the calculation grows beyond any assigned value.
- Where possible performance is compared against the previous year and the three-year average.
- A full explanation of all the counting conventions can be obtained from the 2011/2012 Scottish Policing Performance Framework technical notes. The technical notes are available at <http://www.acpos.police.uk/SPPF/Index.html>.
- The measurements detailed in this report are only the ones where the police are the data providers or have access to the data. The report does not reflect all the measurements within the Scottish Policing Performance Framework (SPPF).
- Figures detailed as per 10K of the population relate to the resident population and does not take cognisance of transient or migratory populations.

Click to return to [Contents](#) page

- Whilst great effort has been made to ensure that the year-on-year change and comparison to three-year average displayed in the tables is accurate, these figures are subject to rounding. In addition, three-year average figures and percentage calculations are also subject to rounding.
- Currently there is no national standard in relation to incident recording. Consequently, there will be some variation between forces in the extent to which incidents are recorded. Some forces record only those which involve interaction with members of the public e.g. complaints of antisocial behaviour or reporting a crime or road collision. Other forces, in addition to recording those incidents which involve interaction with members of public, also use their IT systems to record non-interaction incidents e.g. abnormal loads, warrants etc.

INTER-RELATIONSHIP BETWEEN SOAs, SPA AND THE SPPF

Scottish Government/Single Outcome Agreements

The purpose is to focus Government and public services on creating a more successful country, with opportunities for all of Scotland to flourish, through increasing sustainable economic growth.

Strategic objectives are:

- Wealthier and Fairer - enable businesses and people to increase their wealth and more people to share fairly in that wealth.
- Healthier - help people to sustain and improve their health, especially in disadvantaged communities, ensuring better, local and faster access to health care.
- Safer and Stronger - help local communities to flourish, becoming stronger, safer place to live, offering improved opportunities and a better quality of life.
- Smarter - expand opportunities for Scots to succeed from nurture through to life long learning ensuring higher and more widely shared achievements.
- Greener - improve Scotland's natural and built environment and the sustainable use and enjoyment of it.

To enable the Scottish Government to meet those strategic objectives each local authority has signed up to a Single Outcome Agreement (SOA). These are agreements between the Scottish Government and each Local Authority which sets out how each will work in the future towards improving national outcomes for the local people in a way that reflects local circumstances and priorities. Further information on the National Performance Framework is available at

<http://www.scotland.gov.uk/Publications/2007/11/13092240/9>

Click to return to [Contents](#) page

Scottish Policing Assessment

The ACPOS Scottish Policing Assessment 2011-15 is a 4 year strategy for policing in Scotland. It considers both operational and business priorities for the service with the aim of ensuring that it is best placed to deliver the most effective service to communities of Scotland, ensuring that they live their lives free from crime, disorder and danger. The priorities within the document are:

- Community Policing
- Anti-Social Behaviour
- Violence
- Road Deaths and Injuries
- Public Protection
- Serious Organised Crime Groups
- Terrorism
- Natural Hazards and Major Events
- Service Reconfiguration
- Workforce Development
- Information, Science and Technology

The priorities in the document have been identified through robust analysis and risk assessment of a wide range of information provided by all Scottish forces and the law enforcement agencies as well as key partners such as the Scottish Government and Local authorities. Importantly the priorities identified also take account of the opinions of the public about those issues that matter to them.

Activity undertaken in line with the strategy is monitored through ACPOS with appropriate performance measures identified to assess success in these areas. Outcome based performance measures reflecting these areas is either currently reported in the SPPF or being developed for future iterations.

Scottish Policing Performance Framework

The SPPF is divided into four areas of policing, designed to capture the breadth of police activity.

The four areas are:

- Service Response
- Public Reassurance & Community Safety
- Criminal Justice & Tackling Crime
- Sound Governance & Efficiency

In each of the four areas of policing, High Level Objectives have been identified which reflect the fundamental aims of that area. The performance indicators contained within these areas are divided into Inputs (the resource committed), Activities (the activity or process used) and Outcomes (what is achieved).

There are a number of context measures, which can be used in conjunction with the performance indicators contained within the SPPF. Context measures are not measures of performance, but are designed to provide contextual information of the demands on a police force and the environment they operate within.

It is acknowledged within the police service in Scotland that effective policing is based on sound partnerships. This is reflected in the High Level Objectives within the SPPF. In order to encourage a partnership approach, there are also a number of performance indicators within the SPPF, which should be considered partnership indicators and will rely upon the contribution of a range of partners for successful delivery.

The SPPF structure has also been designed to support the measurement and reporting of local priorities and indicators, in accordance with the principles of Best Value. By incorporating the SPPF in their performance reports, forces can ensure greater consistency and transparency when reporting performance information to Police Authorities and the public throughout Scotland.

The SPPF also complements and supports the delivery of the Scottish Government's Strategic Objectives. It contains the associated national indicators that relate to criminal justice and should be seen as a useful source of performance indicators for inclusion in SOAs.

Significant Changes In National Performance

(commentary)

Number of quality of service closed allegations contained within complaints cases

Across Scotland, there has been a wide variation in the number of quality of service closed allegations with some forces experiencing a decrease and others an increase. Each complaint case may contain one or more allegation(s).

Investigations into allegations can be very complex and may be dealt with in a different reporting period. For example, a complaint case could be received in April but investigations into the allegations not concluded until August.

For this reason comparisons cannot be made year on year or across forces.

Proportion of 999 calls answered within 10 seconds

The number of 999 calls answered within 10 seconds is increasing however Northern and Tayside have reported a decrease in performance. Reductions in police staff have affected performance in this area however steps are being taken to address this.

Time taken to respond to emergency response incidents

Tayside is in the process of changing their call grading and this may already be reflected in the quality of the data captured. This will continue until the national call grading system is fully implemented which is expected by the end of October 2011.

The proportion of non-emergency telephone calls abandoned/lost

The general direction of travel for the proportion of non-emergency telephone calls abandoned/lost is decreasing when compared to the previous year. However, some forces had noted a reduction in performance, forces are committed to providing a high level of service response and are implementing various steps to address this issue. Tayside have introduced a Public Assistance Desk although the benefits in performance are not expected until Quarter 3 2011/12.

In Quarter 1 2011/12, Strathclyde introduced a 'touchtone' facility which has led to an improvement in call routing. In turn, more resources are available to answer calls leading to fewer calls abandoned/lost.

The proportion of non-emergency telephone calls answered within 40 seconds

The 'touchtone' facility introduced in Strathclyde has also significantly improved the proportion of non-emergency calls answered within 40 seconds. A 19% increase was recorded for the first quarter of 2011/12 when compared to the same period last year.

Number of recorded crimes and detection rates

Group 1 to 4 recorded crimes are primarily criminal acts directed towards a specific intended victim.

Group 5 to 7 are predominantly crimes and offences that do not have a specific intended victim and can be:

- a) identified through proactive policing measures;
- b) offences against the state e.g. resisting arrest, obstructing police constable etc.; and/or
- c) evidence led e.g. speeding, drink driving etc.

These crimes and offences can therefore fluctuate significantly year on year.

Group 2 – Crimes of indecency

The new Sexual Offences (Scotland) Act 2009 became effective from 1 December 2010. It is recognised that this may have a potential impact on crimes of indecency which can generally fluctuate year on year due to the nature of the crimes recorded. The impact of this legislation will be monitored throughout this year to see whether any increase highlighted is due to the new legislation or whether there is another factor causing this increase.

Group 3 – Crimes of dishonesty

The national trend for crimes of dishonesty is a decrease, with the exception of Strathclyde when compared to the previous year and three-year average. Strathclyde attributed this to an increase in fraud, theft and shoplifting.

Group 4 – Fireraising, malicious and reckless conduct

The general direction of travel for recorded crimes in this group is decreasing with the exception of Northern who recorded an increase against the previous year, but a reduction against the three-year average.

In relation to the detection rate, the general direction is decreasing when compared to the previous year and three-year average. However, Dumfries and Galloway, Fife and Northern all reported an increase against the previous year.

Dumfries and Galloway have recorded a year on year decrease of vandalism, which with less crimes occurring, the force has greater scope to be more proactive in tackling crime. Support from the local community providing intelligence has also greatly assisted in the apprehension of culprits.

In Fife, the increase is attributable in part to dedicated resources across the force area who are tasked with reviewing all outstanding undetected crimes on a weekly basis.

Group 6 – Offences (miscellaneous)

The general direction of travel for miscellaneous offences is decreasing, with the exception of Central who are experiencing an increase in minor assaults.

Number of racially motivated crimes and offences recorded

The national trend for the number of racially motivated crimes and offences is decreasing however; Central and Strathclyde have recorded slight increases compared to the previous year and three-year average.

Whilst the precise reason for this increase in Central is unclear, it may relate to increased community engagement with partner agencies and the impact of a new Lay Advisors Group within the force. This group comprises of representatives from all equality and minority groups within the community. One of their responsibilities is to support the force in its efforts to identify, prevent and effectively deal with all hate incidents and crimes.

In 2007, Strathclyde introduced reporting by a third party in relation to racially motivated incidents. For a number of reasons a victim of a racially motivated incident may not want direct police contact but can report the matter via a third party e.g. hospital, social work department. The initial increase in the number of incidents reported with the introduction of third party reporting is welcomed. It reflects the increased confidence in reporting incidents and provides a more accurate picture allowing the force to put in appropriate measure to address this issue.

Percentage of reports submitted to the Procurator Fiscal within 28 calendar days

With the exception of Lothian and Borders, all forces are achieving the national target of 80% or more. Lothian and Borders have identified a training need in a policing area as the source of the issue and are currently addressing it.

Percentage of reports submitted to the Children's Reporter within 14 calendar days

This reduction in the number of reports submitted is notable for all forces as in recent years, in line with 'Restorative Justice in Scotland – Guidelines for Police'. There are now more methods of disposals for crimes and offences involving young people than submitting a report to the Children's Reporter.

Before any decision as to the appropriate disposal, additional assessments in the decision making process are now required. If however the decision is that the appropriate disposal is to submit a report to the Children's Reporter then this will have impacted on the 14 day target which is calculated from the date the offender is cautioned and charged to the date the report is submitted to SCRA.

Number of supply and possession with intent to supply offences recorded

The Scottish Crime Registrars Group implemented changes to the counting rules for drug offences. This will affect the comparability of the current and previous year's figures.

Number of antisocial behaviour fixed penalty tickets issued

At a national level, the number of antisocial behaviour fixed penalty tickets issued has decreased compared to the previous year, however increased against the three-year average. This is in line with the general decrease in the number of antisocial behaviour incidents.

In Strathclyde, the percentage of antisocial behaviour fixed penalty tickets complied with is relatively low at 32.8% for this year.

Number of formal warnings issued

The national direction of travel for the number of formal warnings issued is increasing, with the exception of Central and Grampian.

Within Central, the opportunity to dispose of crimes/offences through formal warnings has reduced as a direct result of the reduction in antisocial behaviour incidents. The reduction in the number of formal warnings issued in Grampian was due to a revision in their procedures required to bring them in line with the national agreed standards.

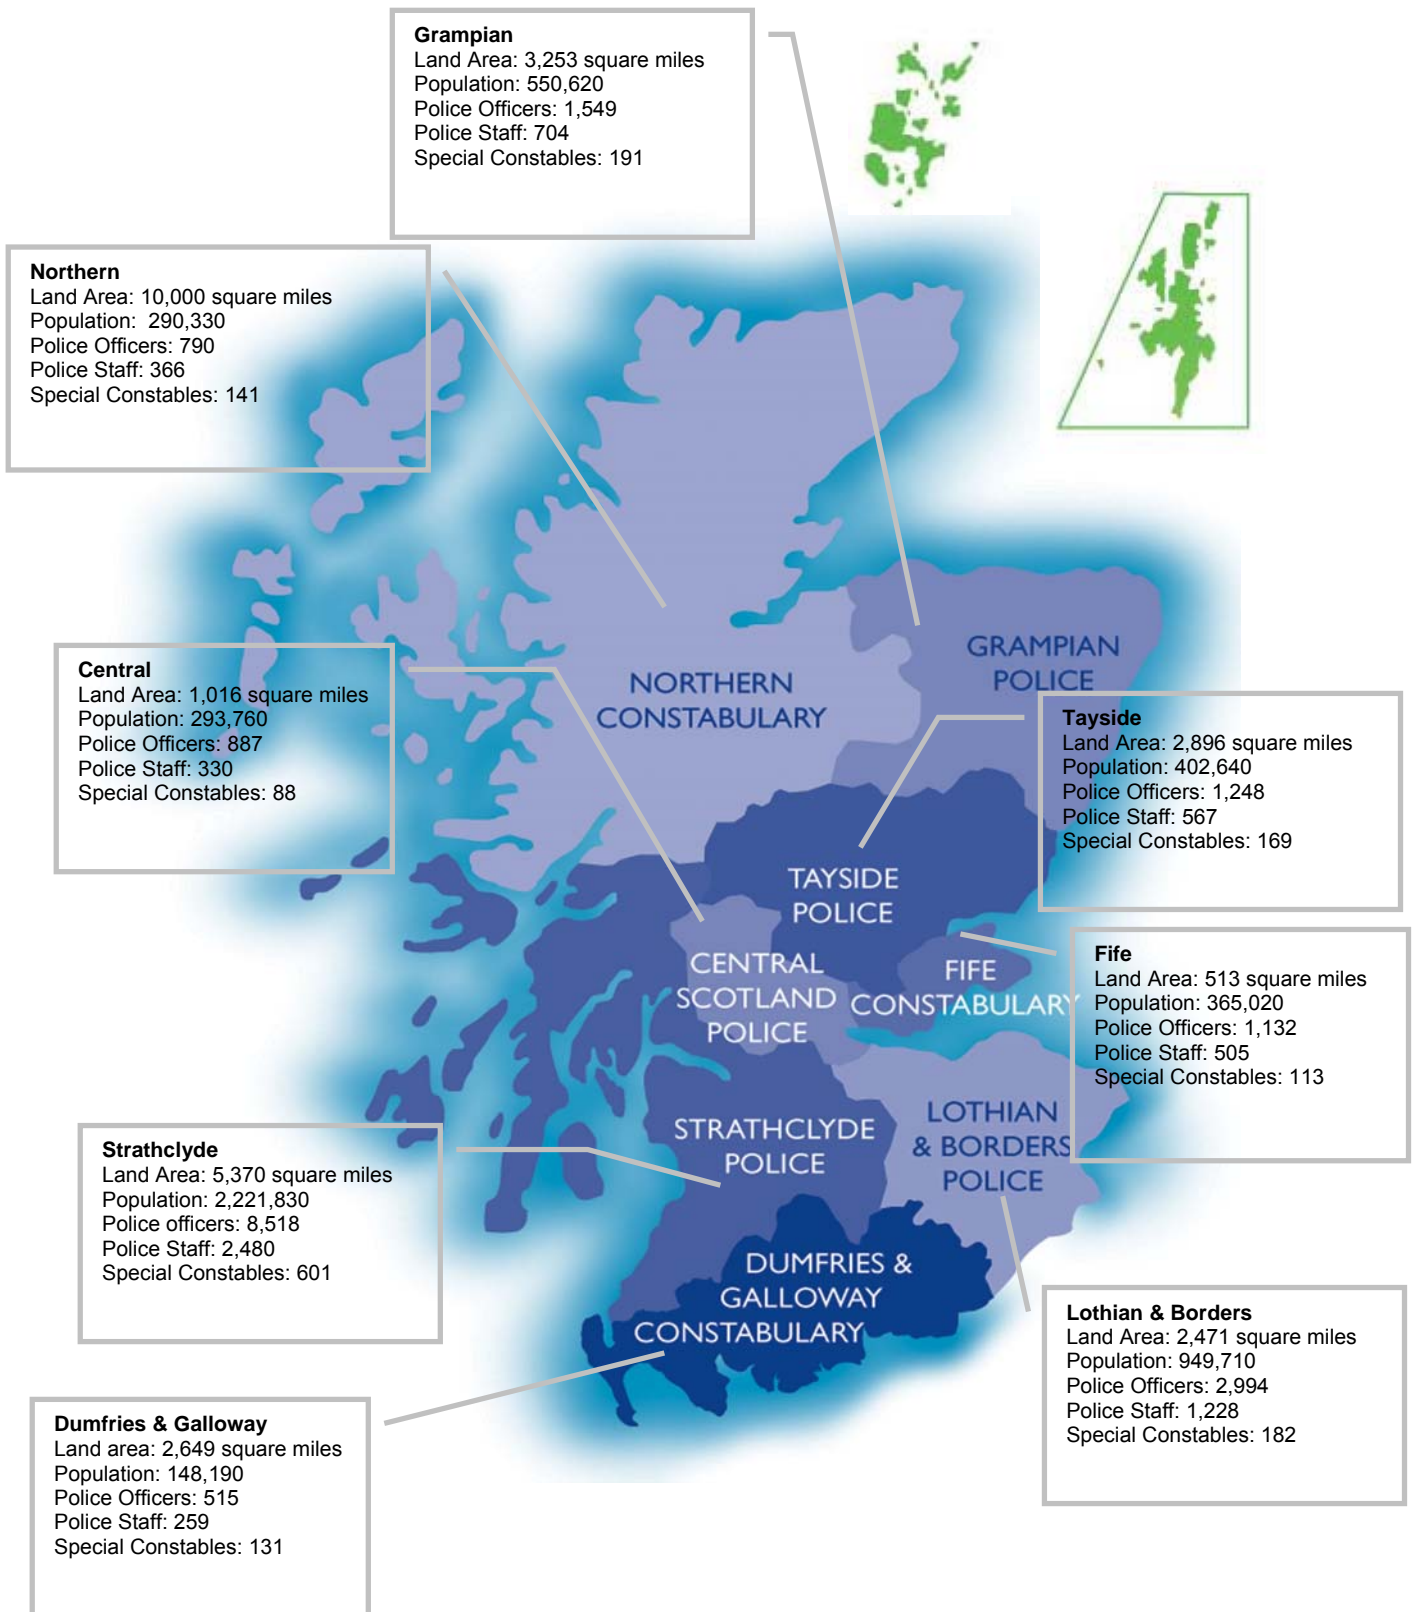

Fife experienced a notable increase in the number of formal warnings issued. This has been the result of a change in process. Previously Fife issued very few formal warnings in respect of antisocial behaviour crimes and offences and used other disposal methods to deal with these crime types. However, for some time now they have moved towards the use of formal warnings. This change in process along with an increased awareness/usage by officers may have contributed to the increase.

Number of incidents

It should be noted that due to the difference in incident logging practices and procedures between forces and indeed within a single force over a period of time, great caution should be taken when making comparisons.

SERVICE RESPONSE

This area of policing relates to the quality of service provided by forces in dealing with the public. It covers all aspects of forces' engagement with the public including initial contact, responding to incidents and providing feedback. It also relates to the public's overall confidence in policing.

PUBLIC REASSURANCE & COMMUNITY SAFETY

This area of policing relates to how forces respond to issues that impact on local communities. It includes forces' and their partners' contribution to the prevention, investigation and detection of crime. It also relates to community engagement and the public's overall perception and experience of crime and disorder in their local area.

Number of recorded crimes and offences and detection rates

The number of recorded crimes & offences; the number of recorded crimes & offences per 10,000 members of the resident population and the detection rate for recorded crimes & offences

Recorded crimes and offences

CRIMINAL JUSTICE & TACKLING CRIME

This area of policing relates to how forces and their partners contribute to the effective and efficient operation of the criminal justice system. It also relates to how forces and partner agencies tackle the issues around national security and serious organised crime.

CONTEXT MEASURES

Context measures are not measures of performance; rather they are designed to provide contextual information to allow better understanding of the demands on a police force and the environment they operate within.
