**Average number of working days lost due to sickness absence per FTE employee, monthly	2.11		1.62		1.43		
Establishment actual FTE	288.96		293.73		292.77		

* We are aware that the reported performance of the 12-month rolling average for working days lost due to sickness absence per FTE throughout this report, is not fully accurate due to current system constraints relating to the calculation of FTE and variable working patterns for some staff. In some cases, the actual absence rate is lower than the reported figure. This does not impact on attendance management for staff and their respective managers. Officers are currently working internally on data quality issues and with the vendor to resolve this anomaly.

** This indicator calculates the working days lost due to sickness per month per employee. This is calculated by dividing the total number of days lost due to sickness during the respective month by the average of all the FTE staff employed during the same month.

	Value	Status	Value	Status	Value	Status	
Staff Costs - % Spend to Date (FYB)	82.5%		90.8%		99.1%		100%

Performance Indicator	Q2 2024/25		Q3 2024/25		Q4 2024/25		2024/25 Target
	Value	Status	Value	Status	Value	Status	
Fleet Services - % of LGV/ Minibuses/ Small Vans Vehicles under 5 years old	71.78%		78.4%		50.42%		80%
*Fleet Services - % of large HGV vehicles under 7 years old	60.95%		66.67%		73.83%		80%

*As the % of large HGV vehicles are being reviewed over a 7-year period, this takes into account the 2 years during which no vehicles whatsoever were purchased. This was due to the market appraisal ongoing at that time and, also developments towards greater nett zero availability. Both sets of data are also subject to variance when an asset is disposed of/replaced. The sharp drop in % of LGV/ Minibuses/ Small Vans Vehicles under 5 years old that can be seen in Q4 is due to many of this type of vehicles being purchased in 2019. There is a total of 589 Light Vehicles of which 297 are under 5 years old. There were 214 light vehicles purchased in 2019 which in theory should be replaced and this is distorting the performance figure. The replacement of these vehicles is currently being reviewed, and vehicles will be replaced subject to the vehicle condition and mileage. If vehicle conditions and mileage are such that the vehicle is considered to be able to operate for longer than the 5 years, then they are not automatically replaced. This is a rolling replacement vehicle replacement programme and the age profiles for vehicles will fluctuate.

	Value	Status	Value	Status	Value	Status	
*% Waste diverted from Landfill	93.8%		95.2%		97.5%		85%
*Percentage of Household Waste Recycled/Composted	42.3%		43%		42.5%		50%

*% Waste diverted from Landfill/% Household Waste Recycled/Composted – These figures are intended and used for internal monitoring only and are based on a rolling 12-month period.

*Service Commentary - *% Waste diverted from Landfill/ Percentage of Household Waste Recycled/Composted

It is worth noting that the overall volume of recycling collected this year is lower than in the previous year. Following discussions with the operations team, it is believed that this reduction is likely due to the adverse weather conditions experienced earlier in the year. This has been supported by a noticeable drop in the number of vehicles entering the transfer station during that period.

Recycling and Diversion rate for rolling 12 months

Description	Tonnage (T)	Percentage	Target
Recycled	38116.5	42.5%	50%
EfW	49395.4	55.0%	
Total Waste diverted from landfill (= Recycled + EfW)	87511.9	97.5%	85%
*Landfilled	2255.7	2.5%	
Total household waste	89767.6	100%	

*Service commentary – Waste sent to Landfill

The wastes sent to landfill during the report period were

- large items that did not meet the acceptance criteria for the NESS Energy from Waste plant due to their size e.g. mattresses and carpets
- some street sweepings
- some EfW bottom ash
- a small amount of waste diverted from NESS EfW to landfill, as per the contingency plan, during last year's planned shutdown of the plant

It is expected that the requirement for landfill will continue to reduce as more financially and environmentally viable alternatives are found and as the biodegradable waste to landfill ban takes effect from 1 January 2026, however, landfill currently remains a contingency option for EfW shutdowns.
