Introduction

The purpose of this Service Update is to provide Elected Members with an update, following a query at Education and Children's Services committee in June 2025

Background

All schools have reported incidents using the current system at some point since 2022/23. The number of schools with no incidents reported has varied overtime and reduced since 2022/23 indicating that staff are more aware of the need to report incidents and the process of reporting an incident. No one school stands out as having no incidents reported.

This positive culture of reporting incidents has been developed through the work undertaken with trade unions, health and safety staff and practitioners through the safeguarding group.
