Dear Eric

I refer to the Market licence applications submitted by Scorpion Gb Ltd for both the West North Street car park and Bridge of Don park and ride site at the AECC.

Further information has been submitted on behalf of the applicant and I would comment on each as follows.

Park and Ride Site Bridge of Don

Following discussions with the Public Transport Unit it is felt that the approval of the market application for the Park and Ride site for a Saturday would not be appropriate given the level of activity and strategic nature of the park and ride site. It is also considered that whilst a market could be generally accommodated on a Sunday that access to the site for market purposes would only be available should public transport services not be operational. It is possible that a park and ride Sunday service may operate from the site over the festive periods or for special events. In such circumstances it would be necessary to suspend market operations over the festive period or for a special event.

In addition I would ask that conditions a to d above be applied to the market application at the Bridge of Don park and ride site.

The Traffic Order regulating the car park may have to be suspended for each event and the applicant will be liable for all and any costs associated with this work.

I trust the above will allow the applications to be concluded.

regards
