<u>VIREMENT PROPOSALS</u>
Re-alignment of account budgets within the cost centre for the Universal Home Insulation Scheme (UHIS).

REVENUE MONITORING VARIANCE NOTES	VARIANCE £'000	CHANGE £'000
Employee Costs Vacancies have been identified and are being managed across the service. The Service will receive a budget allocatio for vacancy savings that will be offset against the current saving. This budget current sits within Operational Support so there will be no overall impact on the Directorate outturn.		0
Property Costs Based on an analysis of monthly charges over the first year of occupancy, it is forecast that gas costs for Marischal College will be £115K below budget while electricity costs will exceed budget by £50K	(75)	0
Administration Costs Savings are forecast in a number of areas across the Service.	(17)	0
Transport Costs Underspends are forecast in vehicle leasing costs (£230K) and in travelling expenses (£15K). The cost of external hire is forecast to be £100K over budget and the cost of vehicle repairs is forecast to be £50K over budget.	s (97)	0
Supplies and Services Savings are forecast in the purchase and repair of equipment within Vehicle Maintenance (£15K). The cost of catering provisions is expected to be £100K above budget in line with current trends in food costs. Overspends totalling £50K ar forecast across a number of areas. An adverse variance of £1.05M is forecast for UHIS but this is due entirely to a mismatch between the allocation of budgets at account level within this cost centre. The income, as shown below, has favourable offsetting variance of the same amount for this reason and it is proposed that the budgets be corrected to reflect better the analysis of costs and income.		0
Capital Financing Costs		
No significant variance from budget is forecast at this stage.	0	0
Income Fee income for Non-Housing Design team is expected to be £250K above budget based on a forecast of increased workload associated with the current year's non-housing capital plan. A review of the allocation of accommodation cost carried out as part of the 2011/12 year-end exercise identified several areas where allocations to services outwith the General Fund had to be increased. The forecast incorporates these revised allocations and it is expected that an additional £370K will be recharged for the current year. The forecast income for UHIS is £1.05M but, as detailed above this is not currently identified in a separate income account.		0

<u>VIREMENT PROPOSALS</u>
Re-alignment of account budgets within the Aberdeen Western Peripheral Route (AWPR) and Townscape Heritage Initiative (THI) cost centres.

FORECAST

REVENUE MONITORING VARIANCE NOTES Employee Costs	VARIANCE £'000	CHANGE £'000
Vacancies have been identified and are being managed across the service. Budget allocations for the AWPR and THI cost centres need to be realigned to reflect more accurately the allocation of costs and income. Currently these variances are being offset against income.	(183)	0
Property Costs		
This variance relates to spend within the AWPR budget that is not correctly allocated and is offset against income.	145	0
Administration Costs		
An adverse variance is forecast in Roads Authority works (£50K) for staff costs allocated to specific projects. Within Building Standards, an adverse variance of £30K is forecast to cover possible one-off costs associated with demolition orders which are not budgeted for but which were incurred in 2011/12.	84	0
Transport Costs		
No significant variance from budget is forecast at this stage.	(1)	0
Supplies and Services		
Savings totalling £45K are forecast in materials and office supplies across the Service. Costs for the use of consultants within Development Management and other services are forecast to be £36K below budget. Consultants fees and payments to outside contractors for the AWPR project are forecast to be £1.59M above budget, due to the expenditure and income budgets currently being netted off against each other for this project.	1,489	0
Transfer Payments		
An adverse variance of £600K is forecast for the THI project although this is offset by a corresponding favourable variance in income.	590	0
Capital Financing Costs No significant variance from budget is forecast at this stage.	(0)	0
Income		
A number of income budgets within Development Management totalling £20K for the sale of maps and other items are forecast not to be achieved this year. The remainder is due to variances arising from the consolidation of budgets for the AWPR (£1530K) and the THI (£650K) into single accounts and are offset by adverse variances detailed above. <u>VIREMENT PROPOSALS</u>
Re-alignment of account budgets within the SURF project cost centre.

REVENUE MONITORING VARIANCE NOTES	FORECAST VARIANCE £'000	CHANGE £'000
Employee Costs		
Adverse variances are forecast for professional fees within the 1st Tier markets and European Funding cost centres, in both cases on the basis that unbudgeted costs during 2011/12 is expected to recur this year.	n 37	0
Property Costs		
No significant variance from budget is forecast at this stage.	(1)	0
Administration Costs		
No significant variance from budget is forecast at this stage.	1	0
Transport Costs		
Travel expense costs are expected to be above budget in a number of areas, mainly in European Funding, AREG and North Sea Commission. In most cases these costs are recoverable and offset by income.	14	0
Supplies and Services		
Events expenditure is forecast to be £16K above budget, although it is expected that this additional cost will be recovered through income.	16	0
Transfer Payments		
The budget for the contribution to Glencraft is no longer required under this heading and this is reflected in the forecast	t. (18)	0
Income Shortfalls in income are forecast in the Marketing and Design service - £230K for advertising income and £70K in othe income. Exhibitions income is forecast to be £30K below budget, based on the level of income achieved in 2011/12. International Marketing income is forecast to be £30K below budget. A favourable variance of £60K if forecast for income for the SURF project due to a mis-alignment of budgets within this cost centre and this variance is offset by adverse variances in staff costs	r 338	0

VIREMENT PROPOSALS

Operational Support holds budgets for staff vacancy savings to be applied across the Directorate. It is proposed to reallocate these savings to the appropriate Services on a basis to be agreed with the Heads of Service.

REVENUE MONITORING VARIANCE NOTES Employee Costs	FORECAST VARIANCE £'000	CHANGE £'000
£250K of this variance related to vacancy savings which are to be reallocated across the Directorate. The remainder represents specific savings in staff costs forecast within Operational Support.	214	0
Property Costs No significant variance from budget is forecast at this stage.	0	0
Administration Costs Adverse variances are forecast in storage and archiving (£15K) and in copying and subscriptions (£15K). In both cases this is based on a comparison of actual spend in 2011/12 with the budget provision for 2012/13.	30	0
Transport Costs No significant variance from budget is forecast at this stage.	(1)	0
Supplies and Services Various small savings are forecast in a number of areas.	(6)	0
Income Recoveries from Trading Operations are forecast to exceed the budget provision in the current year.	(196)	0
	41	0
