FAO Kelly Zebedee

Hi Kelly I refer to the above and your Fax / Letter regarding the inspection report on the overhead lighting supports etc.

I tried to contact John Brown / John Muirhead both of whom used to be involved with the works carried out within schools but to no avail their details appear to have been disabled within the search system available to me.

I have looked at the previous report which was valid till November 2012 and noted that although the majority of the items identified were indicated as to be for your own consideration as to the extent of repair or other maintenance work to be carried out the bottom three items do indicate that remedial work should be carried out. I would therefore ask that these items be attended to ASAP.

Also as the expiry date has passed I would also ask that a new examination be undertaken ASAP.

Please note I have cc'd Licensing into this reply.

Regards
