**Subject:** Objection re planning application 130918

Dear Sir/Madam,

I am writing on behalf of Dyce and Stoneywood Community Council re planning application 130981 (proposed explosive storage facility at Hillhead of Clinterty). We are of course aware that the period for public comments is past, but a number of residents have recently approached us with their serious concerns re this application.

We object for the following reasons:

- 1) Unacceptable effect on amenity at Elrick Hill Country Park.
- 2) Unacceptable traffic (lorries with dangerous cargos) on country lanes in the vicinity, especially at the Tyrebagger junction with the A96.

We also regard the application of the "20 metre notification rule" as inappropriate in this case, which meant that nearby residents in this rural area were not notified of this application when it was submitted.

I trust that this application will now be referred to the full planning committee.

Best regards,  
Bill Harrison (Secretary)

Comment : I object to this application on the following grounds:

- 1) The site in question is designated in the Aberdeen Local Development Plan as Green Space Network and is therefore inappropriate for this kind of development. GSN policy allows for free public access which would necessarily be denied by this type of storage facility because it demands high security.
- 2) The site is right beside Elrick Hill Country Park. The development would have high visual impact on the ambience of the park and on the surrounding landscape generally. The inclusion of a loaded gun store beside an area used by the public for recreation is highly sinister and very worrying.
- 3) The security lighting will have high visual impact in a predominantly rural and elevated area.

**Comment :** SUPPORT FOR APPLICATION

We, Crater Ltd, an adjacent neighbour to the proposer's site, fully support the application by Mr. Mackay.

The proposed facilities are important for the local oil & gas community, and, in particular, the site is well hidden and already has significant industrial use on the immediate area and nearby locale - as such, the proposals serve no detriment to the area and thereby should be fully supported as a positive step for Aberdeen city.

Regards,  
DAVID MILNE
