Comment for Planning Application 140113

Name : Eric Kiltie
Address : Bishop's Gate
78 Don Street
Old Aberdeen
AB24 1UU

Telephone : [REDACTED]
Email : [REDACTED]
type :

Comment : I would like assurance that the works are being planned efficiently and will not drag on for months.
Some other local development projects seem to be taking an unreasonable time to complete.
With good planning, I would expect it would be possible to complete the external works within a few weeks.
Given the proximity of the site to my property, I worry that the disruption will drag on.

type :

Comment : Use of machinery and power tools for external works will have a direct affect on me.

I would like assurance that there will be due consideration for neighbours and that no noisy work will be conducted in the evenings or at weekends.

Comment : I would appreciate a statement that the proposed works reflect the whole of the applicants intentions for the site.

Some other local projects have had follow-on applications for additional features.

Planning applications shouldn't be made on a drip feed basis. The consultees should be presented with the sum total of the proposed works.

Comment : Given the restricted size of the site, I can't see where; materials, plant and machinery are going to be stored
[REDACTED] t from in parking bays on the adjacent streets.

I would like assurance that this has been considered and there will be no access restrictions as a result of the works.
