

Policy NE5 – Trees and Woodlands

There is a presumption against all activities and development that will result in the loss of or damage to established trees and woodlands that contribute significantly to nature conservation, landscape character or local amenity, including ancient and semi-natural woodland which is irreplaceable.

Appropriate measures should be taken for the protection and long term management of existing trees and new planting both during and after construction. Buildings and services should be sited so as to minimise adverse impacts on existing and future trees and tree cover.

Native trees and woodlands should be planted in new developments.

Where trees are affected by a development proposal the City Council may make Tree Preservation Orders.

A tree protection plan for the long term retention of trees should be submitted and agreed with the Council before development commences on site.

See Supplementary Guidance on both protecting trees and woodlands and the trees and woodland strategy for Aberdeen for more information.
