APPLICATION REF 161189/DPP

DEVELOPMENT ADDRESS 455 GEORGE STREET AB25 3YB

Dear Mr Miller,

I wish to lodge an objection to the proposed above application because,

The height of the building will still block natural light and sunshine to our homes and drying area.

Over development of student accommodation in the area.
Parking problems in the area.

The number of students to be housed in such a small area 121 against just 47 residents who live at Fraser Court
The loss of 2 roof gardens not for use of students but perfect nesting area for sea gulls.

The designs of the buildings on George St complement each other, where no one suffers loss of sun and natural light.

The height and back elevation of the proposed build does not do this, it is too large high and wide like a square peg in a round hole that we have to look at every day.

With the impending builds going on round the city it has to stop somewhere, the disruption on George St and Hutcheon St and with 4 bus services and traffic diversions would be horrendous.

I like my view of George St as it is.
What about the children where do they play?

P.T.O.

I would like to thank the councillors who attend the on site meeting, to see for themselves we spoke the truth about how high and close the accommodation will be.

If we fail will we have construction work going 24/7 not forgetting it is bedrooms, and for some their living rooms as well. We can't afford to sit in a cafe all day everyday to get away from the noise.

Yours Sincerely
