Hello Ross,

We have discussed the above application at our September Community Council meeting and it has been minuted and agreed that Rosemount and Midstocket Community Council submit an objection to the application on the basis of importance of retaining all existing urban green spaces in line with the Local Development Plan. We would also encourage the consideration is given to developing the green space for a community purpose in support of the considerable Community objections that have been communicated to the Community Council.

I trust the above is in order to record our objection and ensure that this is communicated to the Planning Development Management Committee when it considers the application.

Regards, John
