

Community Planning  
Aberdeen

**DRAFT LOCALITY PLAN 2017-27**

**Woodside, Tillydrone and Seaton**

Dear Reader

During 2016, Community Planning Aberdeen started drafting a Locality Plan for Woodside, Tillydrone and Seaton, which sets out the vision of local people for the area. It identifies the priorities of the community and early ideas for making improvement.

The priorities have been developed in partnership with Woodside, Tillydrone and Seaton residents who have put forward their views and ideas through a range of events, consultations and focus groups over the last couple of years.

The Plan is very much a draft and will be developed further through discussion and debate in the community over the coming months and taken forward by the Locality Partnership being established.

The Locality Partnership will manage and oversee the plan and ensure it delivers change for Woodside, Tillydrone and Seaton, by working in partnership with the community and a range of third sector, private and public services partners. At least 50% of the Partnership will be members of the community and we are about to begin recruiting for community representatives and hope to have first meeting of the Partnership during April 2017

Key Points:

- This draft plan was endorsed February 2017 by Community Planning Aberdeen as a living document and draft which will be developed further by the community and taken forward by the Locality Partnership which will report back to the community and Community Planning Aberdeen;
- This draft plan will be considered by the Council on March 15<sup>th</sup>;
- We are about to begin taking early comments and feedback on the plan through distribution and discussion across the community;
- We will be working with groups and organisations throughout the coming months to further refine and develop the plan, with the Locality Partnership taking a leading role in this.

# Introduction

Tillydrone, Woodside and Seaton are up and coming areas within Aberdeen with a strong sense of community spirit and a wide range of assets. Woodside recently celebrated 125 years since becoming incorporated in the City of Aberdeen yet still maintains a strong sense of community and identity.

The vision and strategic priorities set out within this ten year Locality Plan provide a clear focus for the future to deliver improvements on those areas where further work is required to ensure people in these communities and young people in particular, have equality of opportunity to develop their full potential.

The aim of the plan is that it brings together everyone who has an impact in delivering against these priorities – a wide range of services across the City Council, but also partners in health, police and other public partners. Essential elements in delivering the plan are both the community projects and networks and third sector providers who deliver services in the area. Across Tillydrone, Woodside and Seaton, there are a significant number of long established community projects which we will work with in delivering the plan. These include the regeneration networks in Woodside and Tillydrone as well as the following:

Fersands and Fountain Community Project  
Woodside Fountain Community Centre  
Tillydrone Community Flat  
Printfield Project

Aberdeen Lads Club  
Lighthouse  
M26  
STAR Flat  
Seaton Project

Seaton Rehab  
St Machar Parents Support Project  
Tillydrone Community Centre

This plan is based on discussions and events which have taken place with community residents, community organisations and service providers across the locality, including the planning event at St Machar Academy on 8<sup>th</sup> October 2016. The priorities from that event have been circulated and further discussed with a range of groups across the locality. It also links with the Aberdeen City Local Outcome Improvement Plan (LOIP) as well as the Strategic Assessment for Woodside, Tillydrone and Seaton.

There are a number of significant developments across the area including the potential new school in Tillydrone, the redevelopment of Station House Media Unit, a new community hub in Tillydrone, the Community Hydro Facility and digital projects with the University.

# OUR VISION

## ‘A place where all people can prosper’

- the vision for Aberdeen City.

The vision for our locality is a place where all the residents feel engaged, listened to and informed about decisions made. It's a place where the environment is clean and safe for both children and adults to enjoy. It's a community where the local young people feel engaged and are supported to further their education and have job prospects after leaving school. Local community capacity is increased to further the local needs of individual areas and creates opportunity for first steps back to work. This view of improved joined up working was summed up in a comment at the Locality Planning event at St Machar Academy on 8<sup>th</sup> October 2016 as follows:

*‘Stronger partnership working to ensure community needs are met in the right place, at the right time, for the right people’*

## Community Engagement – what the community says

The people of Woodside, Tillydrone and Seaton describe their area as a place:

- where people care about community, with a strong community spirit - people look out for each other;
- that is friendly, with lots of walking areas, lots of play areas;
- that is multi-cultural;
- that is quiet, safe;

- that is clean, has good schools;
- that has community councils that listen.
- that is a growing community, with lots of families
- with vibrant people

## IMAGINING ABERDEEN

Aberdeen City Council asked Children's Parliament to work with children to imagine Aberdeen as a city where all children are healthy, happy, safe and doing their best. This is an extract from the report on phase one of the project with children from Riverbank Primary School.

### LIFE AT HOME

Children have been talking about the importance of family. They have considered what help families might need and how to make Aberdeen a good place for families.

As you read this poster ask yourself: What can I do to support families in communities across the city?

Families are important because...

they are always there for you they always listen to you.

they keep you entertained.

You get to annoy your brother.

Imagining Aberdeen...

they keep you safe. they look after you when times are difficult.

They love you and don't want to lose you.  
 They give you life. They keep you safe.  
 Give you breakfast. They take you out and go on holidays.  
 They help you. They play with you.  
 They work so you can have things and be healthy. They think about you.  
 They take you to school and make sure you get an education.  
 If you didn't have a family you would feel upset.

Families are important because:

If your child is ill you need help and medicine  
 Money to get by and to be able to buy things from the shops.

If families can't cope they need other carers to help.

What help or support do families need?

Families split up.  
 If you lose your job you need help.  
 Children can help by doing cleaning and shopping.

FAMILIES

More flowers, trees and parks.  
 Stop dogs pooping everywhere.

More wardens.

Better lights in the street.

How can we make Aberdeen a good place for families?  
 Help families if they are worried about drugs.

No more racism.  
 Keep it tidier, more bins, less rubbish.  
 Better locks at home, stop stealing.  
 Stop people drinking alcohol.

## HOW WE WILL WORK TOGETHER

### Our Locality Partnership

Our Locality Partnership will work with existing networks including Woodside and Tillydrone Network and emerging groups in Seaton and consist of representatives from:

- Community
- Police Scotland
- Aberdeen City Council
- Schools
- Third Sector
- Health and Social Care Partnership

A Locality Partnership will be established for each of the Localities to provide local leadership of the plan development and scrutinise overall delivery of progress against improvements.

The Locality Partnerships will have a critical role in facilitating effective joint working between local staff and communities to ensure that delivery of the Locality Plan remains on track and any barriers to effective partnership working are removed. This signals a big change from the traditional planning approach to one which actively seeks out different perspectives and shares responsibility for the success and leadership of the plan across partners and community. This approach is consistent with the communities desire to have increased local influence and control over decision making.

The successful delivery of this plan will require a number of partners and the community to work together to develop action against priorities by analysing evidence of what is working elsewhere, taking risks, piloting and scaling up new ways of working as well as looking at creative ways to resource key actions.

The membership of the Locality Partnership will have at least 50% Community representation and the makeup and recruitment of this will be determined by the community with support from SCDC during the first quarter of 2017 and a rolling programme of support and development will be a priority.

We also recognise that the wider community need to have opportunities to participate in the development and delivery of the plan and we will work with existing local networks, develop regular stakeholder events, community survey's , use digital platforms for engagement as well as developing new ways of engagement as we develop.

How will we know we are getting it right?

1. Our actions will speak louder than words
2. We will have robust reporting against the performance measures which will be clearly communicated, where we are achieving improvements we will celebrate success together and where we not achieving our goals we will increase focus and try out solutions
3. We will try new things, We will learn from our mistakes and we will never give up
4. The Community will feel increasing engaged and involved in the process and we will increase the number of people involved

DRAFT

# OUR PRIORITIES

These priorities have been developed from the locality planning event at St Machar Academy on 8<sup>th</sup> October 2016 with follow-up consultation in the community to ratify and develop them.

## Our People

The population of Tillydrone, Seaton and Woodside, and indeed that of Aberdeen City, has risen sharply over the last decade and in 2014 the population of the neighbourhood was estimated at just almost **14,000**; an increase of 12% from 2002.

### Population projection growth by 2037

**48% Our Locality**

28% Aberdeen

Population projections based on past birth, death and migration patterns indicate that this trend will continue, however given the current economic climate and recent political developments, there is some degree of uncertainty as to the accuracy of these projections.

The population of Tillydrone, Seaton and Woodside is very diverse, with around a **quarter** of the local population born in a country other than the UK. In particular, more than a **fifth** of the population of Tillydrone were born in another European country – mostly Poland. Linked to this diverse population, a language other than Scots or homes in the locality, and a population have some difficulty

10% of the population of the locality have some difficulty with the English language?

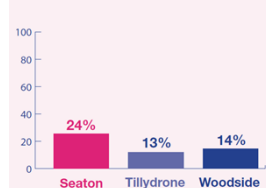

English is commonly spoken within sizeable proportion of our resident with the English language. Not only for the education of both children and engaging with the local community.

Seaton, Tillydrone and Woodside are very family-orientated

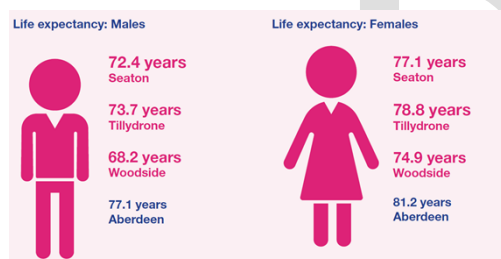

more than **17%** of the combined population. Demand for Early Learning and Childcare is high, and is projected to rise considerable in coming years as the local authority seeks to implement government's commitment to almost **double** the number of funded hours available to all 3 and 4 year olds, and eligible 2 year olds, with an ambition to roll out funded provision to all children aged between 1 and 4.

neighbourhoods and children make up

24% of the population of Seaton are aged 16 – 24, in Tillydrone its 13% and in Woodside its 14%.

Generally, people living in Tillydrone, Seaton and Woodside – across all age groups – have poorer life outcomes than peers from less deprived areas of the city; academic attainment tends to be lower, earnings potential lower and life expectancy shorter.

DRAFT

## Our Place

Seaton, Tillydrone and Woodside are all neighbourhoods that sit to the North / North West of Aberdeen City Centre. The neighbourhoods are, in general, characterised by low cost, often socially rented, accommodation. Collectively, Tillydrone, Seaton and Woodside make up one of the most deprived areas of the city.

There are extensive areas of open and wooded land in the locality, and Seaton Park is a much loved and well utilised park, but the general feeling is that the area and its residents would benefit from a large scale clean-up of open space.

Generally, people living in the locality are proud of the area, enjoying living there and say there is a real sense of community within the area. But there are some issues which the community identify as needing addressed;

Substance misuse is a concern to local residents, and carelessly discarded drugs litter presents a risk to public health, albeit in reality that risk is very small. Discarded drugs litter often generates fear, anger and frustration, and the presence of litter highlights the wider problem of drug misuse within this community.

Transport is a major contributor to carbon emissions and in Aberdeen there is an exceptionally high level of car ownership and usage which contributes to areas of poor air quality. It is a vicious circle – poor air quality and poor road safety discourages people from walking or cycling, yet reducing reliance on private transport is the best way to improve air quality.

The high levels of car don't own or have important.

21% of people in Our Locality use public transport to travel to their place or work or study, 15% in Aberdeen.

ownership are not seen in every area of the city, and for those that access to a car, accessible, affordable and timely public transport is

As a result of climate change, extreme weather events are becoming more **frequent** and **intense** with warmer, wetter winters and drier, hotter summers. Seaton, Tillydrone and Woodside are all within an area identified by Scottish Environmental Protection Agency (SEPA) as being potentially vulnerable to flooding.

# OUR ECONOMY

## Our Economy

Tillydrone, Seaton and Woodside are neighbourhoods that lie to the north of Aberdeen City Centre. All three neighbourhoods are widely regarded as being amongst the most deprived in the city.

**Around 14% of the population of Our Locality are unemployed. In parts of Woodside it is 24% of the population.**

**Our Locality**

**Parts of Woodside**

People living in Tillydrone, Woodside or Seaton are more likely to be unemployed, and unemployment is increasing.

**Unemployment is rising in Our Locality. The number of out-of-work benefits claimants in the locality has increased by 64% between Jan 2015 and July 2016, while in the city, the number has more than doubled (119% increase).**

**Our Locality**

**Aberdeen**

The downturn in the local economy, linked to the drop in global oil prices, the high cost of oil production in the North Sea and the city's over-reliance on the oil and gas sector, has resulted in the number of claimants of out-of-work benefits in the locality rising

work benefits in the locality rising

Generally, people in the area that are employed typically work in unskilled or low-skilled occupations, often in low paying industries. As a consequence, the median household income in our area is significantly less than the equivalent for Aberdeen City, and around 16% of the population of the locality are income deprived.

employed typically work in unskilled or low-skilled industries. As a consequence, the median household income in our area is significantly less than the equivalent for Aberdeen City, and around 16% of income deprived.

**Median household income**

£18,155 Seaton

£18,480 Tillydrone

£22,060 Woodside

£30,735 Aberdeen City

Between **20-** and **30%** of households in this locality are living in fuel poverty, and around a quarter of children in the area are living in poverty.
