

Project Summary

Date:
19/3/17

Project Name	Alzheimer's Scotland Post Diagnostic Support Service	Author	Gail Woodcock
---------------------	--	---------------	---------------

1 Summary of Project

This proposal seeks to continue an existing post diagnostic support service (previously funded by the Change Fund) which provides advice, information and support to people recently diagnosed with dementia and their families and carers.

This continuation will allow time to develop sustainable plans for ongoing support, without negatively impacting on those affected in the meantime.

2 Anticipated Benefits

- No negative impact to service users while further work is undertaken and an ongoing sustainable plan developed.
- Appropriate time allocated to allow review of existing services linked to the development of our strategic commissioning model, an options appraisal to be carried out and full business case to be developed.

3 Financial Implications

Expenditure	2017/18 (£)
Contract Cost	104,000

Note: It would be intended to fund this from the Integrated Care Fund.

4 Exit Strategy

This is a one off cost to continue the project for one year while a sustainable plan is developed.
