Application ref 170755/OPP

I would like my reservations for the planned development at 38 Cameron Street AB238QB to be taken in to consideration.

We live at no. 36 and feel that such an extension would be obtrusive. The height would greatly reduce any day light to my bedroom, bathroom and hall. I have observed other properties in our area and can only see this sort of development when the gable end have no property next door e.g. the last house or corner plot. I have also observed only a garage with a flat roof built at the side of homes with the same spec. as our property. We also feel being so closed in would be jeopardise our security to a great extent, especially at night. Our home would be very secluded and the enjoyment of our home would be reduced

36. Cameron St.
