

## **Appendix 3     Baseline Data, Targets and Trends**

Appendix 3.1 – Climatic Factors

Appendix 3.2 – Air

Appendix 3.3 – Water

Appendix 3.4 – Soil

Appendix 3.5 – Biodiversity, Flora and Fauna

Appendix 3.6 – Human Health

Appendix 3.7 – Population

Appendix 3.8 – Cultural Heritage

Appendix 3.9 – Landscape

Appendix 3.10 – Material Assets

Appendix 3.11 – Employment Land

## Appendix 3.1 Climatic Factors

| Quality and availability of public open space in urban and rural areas                   | The Aberdeen City audit identified 3471 hectares of open space (not including private gardens or sites under 0.2 hectares). The quality of open space varies across the city with public parks and gardens rating the highest and allotments and business amenity open space scoring the lowest rating | Data for Aberdeenshire Councils Open Space Audit was not available.                                                                                                                                                                         | The poorest quality parks and open spaces tend to be found within the regeneration priority areas. It is more difficult to provide open space within densely populated areas. | Development pressure to build on urban open spaces.<br><br>Revised standards for open space could encourage the development of more useful, publicly desirable and efficient types of open space, such as natural areas, green corridors, play spaces and allotments. This detail is likely to be taken forward through the local development plan and supplementary guidance. | Aberdeen City Council (2010) Open Space Audit                                                                                      |

| Life expectancy at birth (years) | <p><b>Aberdeen</b></p> <p>Male</p> <ul style="list-style-type: none"> <li>• 2002-2004 – 74.4</li> <li>• 2012-2014 – 76.8</li> <li>• 2014-2016 - 76.4</li> </ul> <p>Female</p> <ul style="list-style-type: none"> <li>• 2002-2004 – 79.9</li> <li>• 2012-2014 – 80.1</li> <li>• 2014-2016 – 80.8</li> </ul> | <p><b>Aberdeenshire:</b></p> <p>Male</p> <ul style="list-style-type: none"> <li>• 2002-2004 -79.4</li> <li>• 2012-2014 -76.3</li> <li>• 2014-2016 – 79.2</li> </ul> <p>Female</p> <ul style="list-style-type: none"> <li>• 2002-2004 -80.8</li> <li>• 2012-2014 -82.3</li> <li>• 2014-2016 -82.4</li> </ul> | Life expectancy is improving year on year in the City and the Shire compared with Scottish figures. The Shire is faring much better than the City. In both the City and the Shire female life expectancy is much higher | Increasing life expectancy has longer-term cost implications for local authorities for service provisions for ageing population. | <p>National Records of Scotland (2018). <i>Life Expectancy for areas in Scotland</i>, [Online] Available at <a href="https://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas">https://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/life-expectancy/life-expectancy-in-scottish-areas</a></p> <p>Accessed 10/1/18</p> |
