

LSO Representation

We would like to make a representation of the following

Regarding the variation application of The House Of Ginza

The variation includes adding indoor sports, in this case a novelty bucking bronco, a dentist chair for the purpose of lying flat to take alcohol. Our colleagues in Health and safety have not received the appropriate risk assessments and working procedures of the two novelties.

The board may wish to consider a pause of the use of said machines until Health and safety clearance has been issued.
